PRODUCT DESCRIPTION:

1) 5-Layer Coat/Class 3: When worn complete with the Bodywarmer, there are five layers of weather blocking fabrics. Outer coat is independently certified as Class 3, constructed of 100% weatherproof, daylight visible fluorescent PVC coated polyester with 360 degree 3M™ Scotchlite reflective tape to ensure conspicuity at night, dawn and dusk.

Outer fabric meets ASTM F1671 for protection against bloodborne pathogen penetration. The outer coat also includes a hood that rolls into collar, snaps, button storm flap closure, weatherproof zipper and 2-deep patched pockets on the outside shell.

2) 2-Layer Coat / Class 3: Zip out the 3-layer Bodywarmer leaving a 2-layer PVC coated polyester lightweight, Class 3 coat.

3) 3-Layer Bodywarmer with Quilted Sleeves/Class 2. The extra long Bodywarmer worn alone is a high caliber ANSI Class 2 traffic safety and weather garment. The Bodywarmer's outer fabric is 100% weatherproof, daylight visible fluorescent PVC coated polyester with 3M Scotchlite reflective tape, is independently certified to meet Class 2 requirements and has two outer pockets.

4) Bodwarmer with Navy Blue Fabric Sleeves Zipped Off/Class 2. Same as 3) but with blue fabric sleeves zipped off. Ideal for slightly warmer weather.

5) Bodwarmer Reverse Side. Reverse the Bodywarmer to conceal conspicuity and enjoy a dark blue, extra long Bodywarmer, without quilted, padded sleeves. The navy blue side is quilted and made of 65% polyester and 35% cotton.

The Bodywarmer is insulated with a wind and weather blocking polyester fill that comfortably retains natural body heat. Of course, when worn reversed, the layer towards the body is the high visibility PVC coated fabric. The Bodywarmer includes two outer side pockets for hands plus two inside pockets.
